01

PROBLEM STATEMENT

A Real Story. A Real Need.

SwasthyaSaathi AI
Your Health. Our Mission.

A Week Ago, Typhoid Spread in Girls Hostel, MIT Muzaffarpur.

Here's what happened...

1 THEY DIDN'T REALLY KNOW

- Confused about symptoms of typhoid.
- Unclear about which test to conduct.
- No idea who is infected, so couldn't protect themselves.

2 PANIC TOOK OVER

- After knowing they had typhoid, they didn't know how to tackle it.
- Some girls slipped into depression.
- Others couldn't accept that they can also be infected.

3 MISINFORMATION MADE IT WORSE

- Google, YouTube and other platforms gave conflicting answers.
- Too many suggestions, no clarity.
- Every search increased their anxiety.

4 NO ONE TO GUIDE THEM

- No one to explain diet, medication, precautions.
- No follow-up reminders or recovery tracking.
- Felt alone and helpless throughout.

5 WHAT THEY TRULY NEEDED

- Simple, trusted answers in their language.
- Right guidance on tests, treatment & diet.
- Know who's affected & how to stay safe.
- Emotional support and recovery tracking.

OUR OBSERVATION

- Lack of awareness leads to late detection.
- Confusion and misinformation create panic.
- No continuous guidance increases risk and stress.
- What students need is clarity, care and a trusted companion.

THE SOLUTION

SwasthyaSaathi AI

Your 24x7 AI Health Companion

- Trusted Answers
- Outbreak Awareness
- Test & Treatment Plan Guidance
- Diet & Recovery
- Emotional Support
- Reminders & Follow-up

"Information at the right time can save health, reduce fear, and build stronger, healthier communities.

01 PROBLEM STATEMENT

The Prevention Gap

India Can't Afford to Ignore

Healthcare isn't failing because we lack hospitals —
it's failing because people don't get the right information at the right time.

65%+
Rural population lacks access to timely health information
- WHO, 2023

60%
Prefer local language for healthcare communication
- NSSO, 2022

25%
Children miss routine vaccinations due to lack of reminders
- NFHS-5, 2019-21

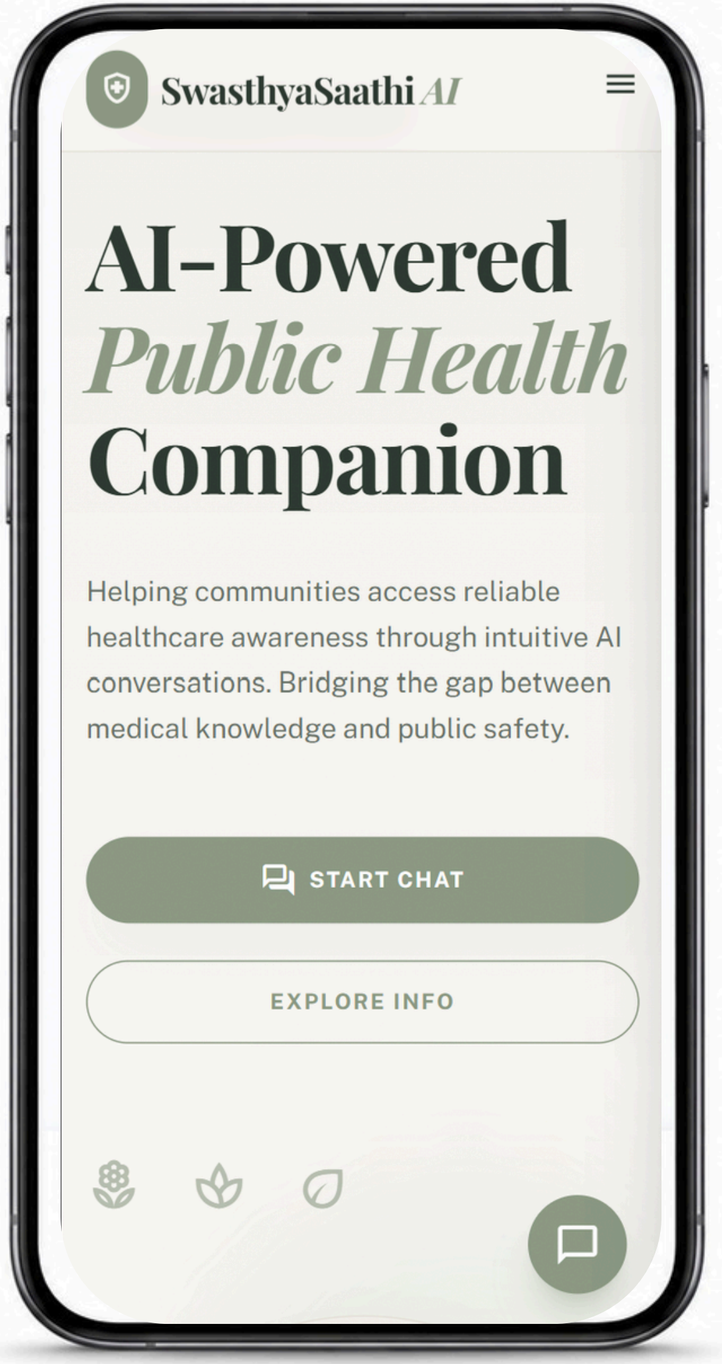

5x
Misinformation spreads 5x faster than verified health information
- WHO, 2020

Low Awareness → Language Barrier → Missed Prevention → Misinformation → High Healthcare Burden

THE REAL PROBLEM

THE IMPACT WE AIM TO CREATE

- **+45%** Increase in Health Awareness
- **90%** Vaccination Compliance
- **-30%** Outbreak Case Rate
- Reduced Healthcare Cost for Families & Public Health System
- Stronger, Healthier & More Resilient Communities

SwasthyaSaathi AI

Your Health. Our Mission.

An Agentic AI-driven public health platform that delivers preventive care, awareness, vaccination support, outbreak alerts and health education— in the language people speak.

Citizen
Web / WhatsApp / SMS / Voice

→

Conversational AI Assistant
Understands in local languages

→

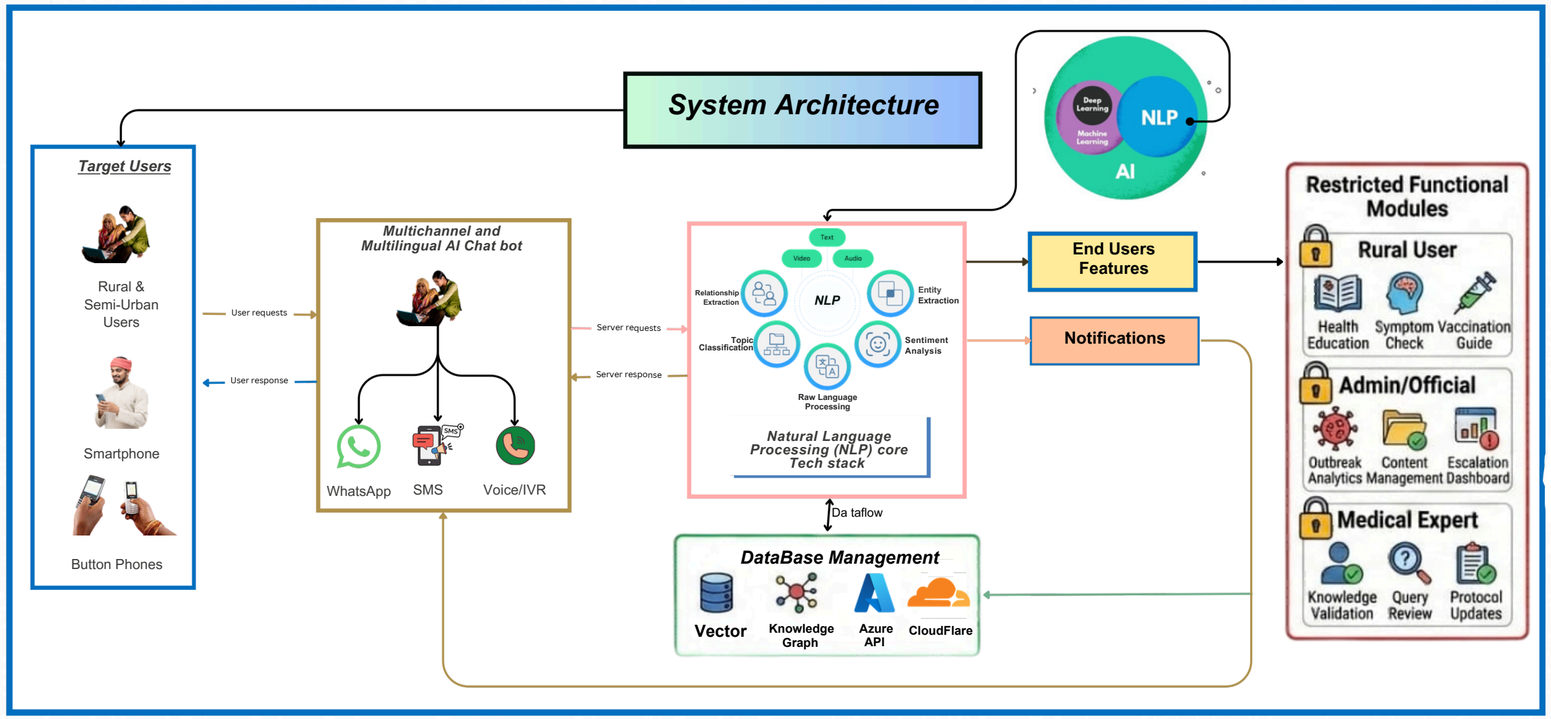

AI Intelligence

→

Trusted Knowledge & Real-time Data
Gov. Sources, Guidelines, Outbreak Data

→

Personalized Response
Guidance, Reminders, Alerts, Education

WHAT SWASTHYASAATHI AI DELIVERS

Disease Awareness
Simple, local language information on prevention, symptoms & care.

Vaccination Support
Vaccine schedules, benefits, nearby centers & reminders.

Outbreak Alerts
Real-time alerts & advisories for early precaution.

Health Education
Articles, videos & tips for healthy living in local languages.

Continuous Follow-up
Reminders, check-ups & feedback for better health outcomes.

Community Impact
Stronger, healthier & more resilient communities.

04 TECHNICAL ARCHITECTURE

Intelligent. Scalable. Secure.

SwasthyaSaathi AI is built on a modular, AI-driven architecture that seamlessly integrates voice, language, and healthcare intelligence.

SwasthyaSaathi AI
Your Health. Your Language. Your Saathi.

TECHNOLOGY STACK

Input Layer
Voice, Text, Image (User Query)

Pre-processing Layer
STT, Noise Removal, Language Detection

NLP & AI Layer
Intent Recognition, Entity Extraction, Sentiment Analysis

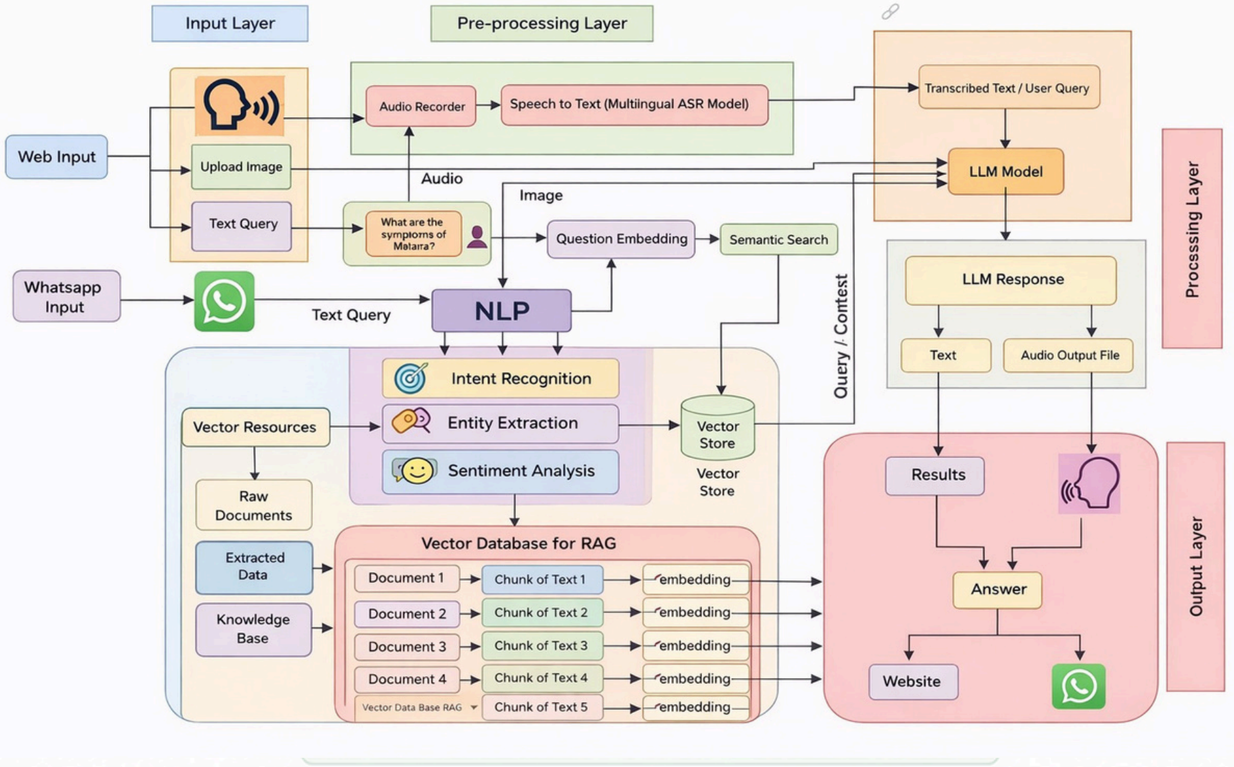

Knowledge Layer (RAG)
Vector DB, Semantic Search, Health Knowledge Base

LLM Layer
Generates Accurate, Contextual Health Responses

Output Layer
Text / Voice Response, Actionable Insights

Security & Privacy
Data Encryption, Consent, Secure Storage

SYSTEM ARCHITECTURE

CORE COMPONENTS

Multilingual Support
22+ Indian Languages via Bhashini APIs

Voice-First Experience
Hands-free, conversational health assistance

RAG + LLM Intelligence
Accurate, reliable & context-aware responses

Omnichannel Access
Web, WhatsApp, SMS, Voice Calls

Secure & Private
End-to-end encryption & data protection

Scalable & Future-Ready
Built to adapt, learn and grow with Bharat

TECHNOLOGIES USED

Python | FastAPI | React.js | Node.js | PostgreSQL | Pinecone | LangChain | OpenAI | Bhashini (India Language APIs) | AWS | Docker

02 AI INFRASTRUCTURE & COST EFFICIENCY

Smart stack. Scalable solution. **Minimal cost. Maximum impact.**

SwasthyaSaathi AI
Your Health. Our Mission.

OUR TECHNOLOGY STACK

COMPONENT	TECHNOLOGY	PURPOSE	COST MODEL
AI Inference	NVIDIA NIM API	High-performance medical reasoning & inference	Hackathon Credits $0*
LLM API	Groq API (Llama 3.3 / DeepSeek)	Ultra-fast LLM inference for real-time conversations	Free Tier $0
Agent Framework	LangChain + Deep Agents	Multi-agent orchestration & intelligent workflows	Open Source $0
Voice AI	Sarvam AI API	Speech-to-Text & Text-to-Speech (Indian Languages)	Free Tier / Credits $0
Communication	Twilio (WhatsApp & SMS)	WhatsApp & SMS integration & alerts	Pay-as-you-go ~$5 – $10
Vector Database	Qdrant	Vector search & RAG retrieval	Open Source $0
Backend	Express.js (Node.js)	REST APIs & business logic	Open Source $0
Frontend	Next.js + React	Modern web app & user interface	Open Source $0
Database	MongoDB Atlas	User profiles, health records & metadata	Free Tier $0
Deployment	Vercel	Hosting & deployment	Free Tier $0

WHY THIS STACK?

Blazing Fast Performance
Groq API ensures ultra-low latency for real-time conversations.

Advanced AI Reasoning
NVIDIA NIM API powers reliable medical intelligence.

Indian Language Support
Sarvam AI enables multilingual voice interaction.

Agentic Workflows
LangChain + Deep Agents orchestrate autonomous AI agents.

Scalable & Cost-Efficient
Open-source tools & free tiers reduce cost while supporting future growth.

MONTHLY COST BREAKDOWN (PROTOTYPE)

NVIDIA NIM API	$0 (Credits)
Groq API	$0
Sarvam AI API	$0
LangChain + Deep Agents	$0
Qdrant	$0
MongoDB Atlas (Free Tier)	$0
Vercel (Free Tier)	$0
Twilio (WhatsApp / SMS)	~$5 – $10

PROTOTYPE OPERATIONAL COST

Less than ₹1,000/month

using startup credits and free tiers.

BUILT FOR IMPACT. DESIGNED FOR AFFORDABILITY.

We combine best-in-class AI services with open-source technology and free-tier infrastructure to build a powerful, inclusive and cost-efficient healthcare solution.

- Minimal Operational Cost
- Cloud Credits Optimized
- Open Source First
- Inclusive & Accessible
- Scalable for Real Impact

03 COMPETITIVE LANDSCAPE

SwasthyaSaathi AI bridges the gap between healthcare information, **preventive care** and **continuous AI assistance.**

SwasthyaSaathi AI
Your Health. Our Mission.

Practo

Revenue (FY25)
₹234 Cr

Primary Offering
Doctor discovery & teleconsultation

Where They Stop
Focused on appointments and consultations

MediBuddy

Revenue (FY26)
₹1,500+ Cr

Primary Offering
Telemedicine, diagnostics, corporate healthcare

Where They Stop
Enterprise healthcare ecosystem

Tata 1mg

Revenue (FY25)

SWASTHYASAATHI AI OFFERS MORE

- AI-first preventive healthcare for everyone
- Continuous support before, during & after illness
- Multilingual voice + chat on WhatsApp & SMS
- Outbreak intelligence & public health alerts
- Personalized health journey & reminders
- Accessible, affordable & rural-first approach

Existing platforms help people after they decide to seek care. SwasthyaSaathi AI is designed to help people before, during and after illness—through preventive guidance, multilingual AI, outbreak awareness and continuous engagement.

04 INNOVATION & UNIQUENESS

Every Health Problem. **One Place.**

SwasthyaSaathi AI
Your Health. Our Mission.

- Disease Awareness
- Vaccination Guidance
- Tests Explained
- Medicine Information
- Mental Well-being
- Emergency Guidance
- Women's Health
- Chronic Care Support

Available On

WhatsApp | SMS | Voice | Web

WHAT MAKES US UNIQUE

Agentic AI Health Companion

Understands, plans, follows up & guides like a real partner.

Preventive-First Approach

Focus on awareness, risk detection, vaccination & early guidance.

Multi-Channel Accessibility

Reach users through WhatsApp, SMS, Voice & Web.

Indian Language Voice AI

Speak naturally in your language and get clear, trusted answers.

05

USER EXPERIENCE & DESIGN

Simple • Inclusive • Conversational

SwasthyaSaathi AI
Your Health. Your Language. Your Saathi.

SwasthyaSaathi AI is designed to be effortless, accessible and engaging for every citizen, in their own language.

OUR DESIGN PRINCIPLES

SIMPLE
Minimal steps, maximum clarity

MULTILINGUAL
22+ Indian languages for everyone

VOICE FIRST
Talk naturally, get instant help

PRIVACY
Your data is secure, private by design

ACCESSIBLE
Web, WhatsApp, SMS & Voice for all

USER JOURNEY

01 OPEN APP
Access via Web, WhatsApp, SMS or Voice

02 ASK / SPEAK
Type, speak or send image in your language

03 AI UNDERSTANDS
Detects intent, understands context & extracts key info

04 VERIFIED RESPONSE
Gets accurate, reliable & easy to understand answer

05 FOLLOW-UP REMINDER
Reminders, alerts & health journey updates

APP PREVIEW

WHY USERS LOVE IT

Easy to Understand
Simple language, no medical jargon

Local Language
Speak or chat in your own language

Works Anywhere
Low data usage, works on basic phones

Trust & Safety
Verified information from trusted sources

Human-like
Natural, friendly conversations

09

IMPACT & SCALABILITY

Better Health Today. Stronger Bharat Tomorrow.

SwasthyaSaathi AI
Your Health. Your Language. Your Saathi.

IMPACT WE CREATE

Health for Every Indian

Breaks Language Barriers

Faster Access to Care

Prevention Over Cure

Lower Healthcare Costs

Healthier, Stronger Bharat

1.4B+ Lives Touched

22+ Languages

24/7 AI Support

Better Outcomes For All

SCALABILITY ROADMAP

Phase 1 Local Start	Phase 2 State Expansion	Phase 3 National Reach	Phase 4 Global Impact
Focus on rural & semi-urban India	Expand across states & regions	Pan-India adoption	Bring AI-powered healthcare to the world
Core AI features in key languages	More languages, integrations & partnerships	Stronger telehealth network & data ecosystem	From Bharat, For the World

Rural India

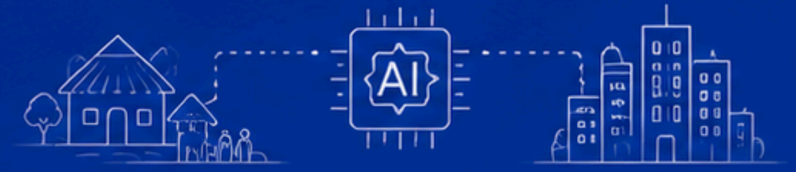

District/State

Pan-India

Global

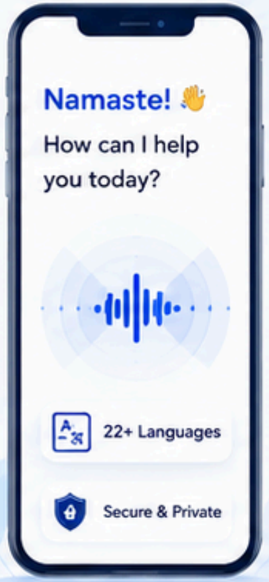

SwasthyaSaathi AI is built to scale compassion, intelligence & access—
for every Indian, everywhere.

10 AI AGENTS ECOSYSTEM

One AI Brain. Multiple Intelligent Agents. Personalized Care for Every Citizen.

SwasthyaSaathi AI
Your Health. Your Language. Your Saathi.

Symptom Agent
Early risk assessment

Medicine Agent
Smart medicine assistant

Vaccine Agent
Reminds, tracks & keeps you safe

Outbreak Agent
Detect, predict & alert early

SwasthyaSaathi AI
Central Health Brain

Health Journey Agent
Track, analyze & guide your health

OCR Agent
Read, extract & manage documents

Voice Agent
Speak, understand & respond

Location Agent
Find nearby care instantly

AI for Every Indian

- Accessible
- Multilingual
- Compassionate
- Trusted

HOW IT WORKS

1. **You Connect** — Voice / Text / Image
2. **Best AI Agent** — Understands your need
3. **AI Brain Processes** — NLP + Knowledge + Context
4. **Knowledge Base** — Trusted medical sources
5. **Verified Response** — Accurate & safe guidance
6. **Follow-up** — Reminders & alerts

Empowering Bharat with Agentic AI for Preventive, Accessible & Personalized Healthcare.
